THINK

AHEAD

Step 2

2004 - 2006

NG Tech branched out in Chicago to focus on product development along with IT Staffing for its growing client base with 100% success rate in challenging projects like SAP Go-Live support, SOX Validation, Custom Software Development in Java and DotNet, Business Critical IT Staffing, etc.

Step 4

2010 - 2012

Demonstrated resilience during recession by innovating concepts like budget staffing, market friendly strategies like Use first and Pay later, Smart Sourcing and Fractional Resourcing while promoting cost saving models like Near Shore development, Remote Consulting and Distributed design and development

Step 6

2016 - 2018

Expanded team in India to research latest trends in the market, Project Management, outsourcing, ERP Customization, Digital Landscaping, Ethical Hacking, Online Security. Acquired Startup companies in agile Product Development

JOURNEY

Where technology not only automates business but also adds value and ethics.

BIRTH

2000

Established in Manhattan by Dr.Namita Deo (a biotech scientist) who could foresee the challenges of Technology in the Next Generation. In order to do her bit, she dreamt of a world with ethical technological practices where technology not only automates business but also adds value. Her vision took shape of a company called Next Generation Technology Inc.

Step 3

2007 - 2009

Launched Outsourcing operations in India for various processes including technical support, software development, recruiting and sales. Acquired ABPII which lead to the channel partnership with SAP, TIBCO and Qlik View.

Step 5

2013 - 2015

Partnered with Federal and State Governments to deliver IT resources and services with best practices in sourcing candidates with constraints on work status, rare skillset, limited rates, etc., Acquired Chicago based Encore Consulting Services Inc to leverage its Business and Technology

PRESENT

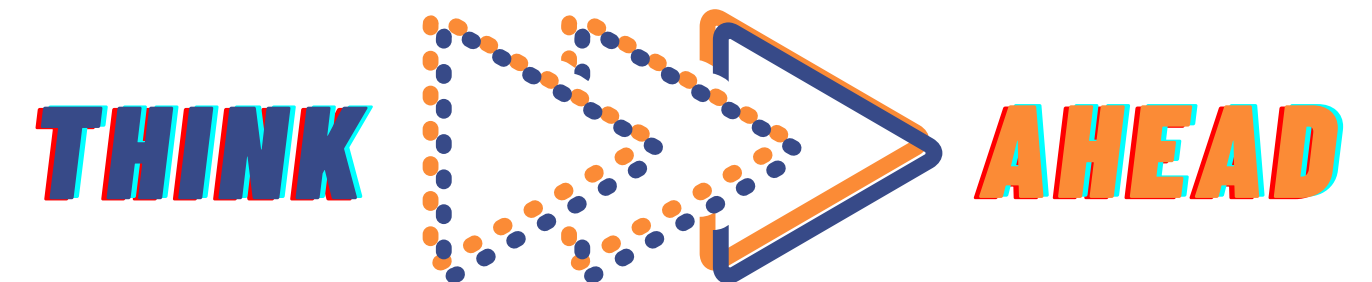

2019 - Now

Divested Encore Consulting Services Inc while retaining all the lessons learned right from setting up of a PMO to custom app development whether native or mobile. Established Transformation as a core offering for Individual Transformation, Organizational Transformation and Digital Transformation of Businesses.

WHAT WE DO

NG Tech partners with local/state & federal government offices and businesses of all sizes to make INFORMATION a dynamic, interactive, valuable asset to the enterprise.

In this age of machine intelligence, the so called 4th industrial revolution, our vision seem to be even more relevant than ever before. At Next Generation Technology, we take pride in being the confidant of our clients. Our business is to create value for our clients by nurturing innovation and designing creative solutions to the most pressing problems & the challenges yet to come.

07

CONSULT NEXT

"Guiding Your Business to the Next Stage"

Driven by values and intellect, we bring deep industry experience to help you navigate the world of technology with best practices to share, diligent people to hire and right technology to implement for the vision in action.

CONSULT NEXT

Technology

- Mobility
- IOT & AI
- Cyber Security
- Data Analytics
- RPA

to help business catch on with disruption, resolve challenges and stay relevant.

People

- Talent Sourcing
- Rightfit Recruiting
- Upskilling

to meet the business critical resource-needs of the clients on contract basis for the project or full-time.

Business

- Management Consulting
- Project Management
- Product Design
- SCM, PLM, CRM and more

to help businesses unleash their potential, become sustainable and more productive.

DEVELOP NEXT

"Developing Futuristic, Performance Based System"

We thoroughly enjoy contributing to the world through our creative development whether it's a simple Mobile App or a custom software specific to the clients need.

We apply agile and accelerated techniques well managed through scrum collaborations while using market insights to stay ahead.

DEVELOP NEXT

Application Development

- *Mobile App Development*
- *Web Design and Development*
- *DevOps Implementation*

to create user friendly applications they help simplify the business of doing business.

Research & Development

- *Market Insights*
- *Disruptive Technologies*
- *Engineering Services*

to analyze and apply what's trending and what will in the future thereby helping clients navigate the VUCA of disruption world with confidence

Software Development

- *Custom software development*
- *Standard Software Customization*
- *Support and Maintenance*

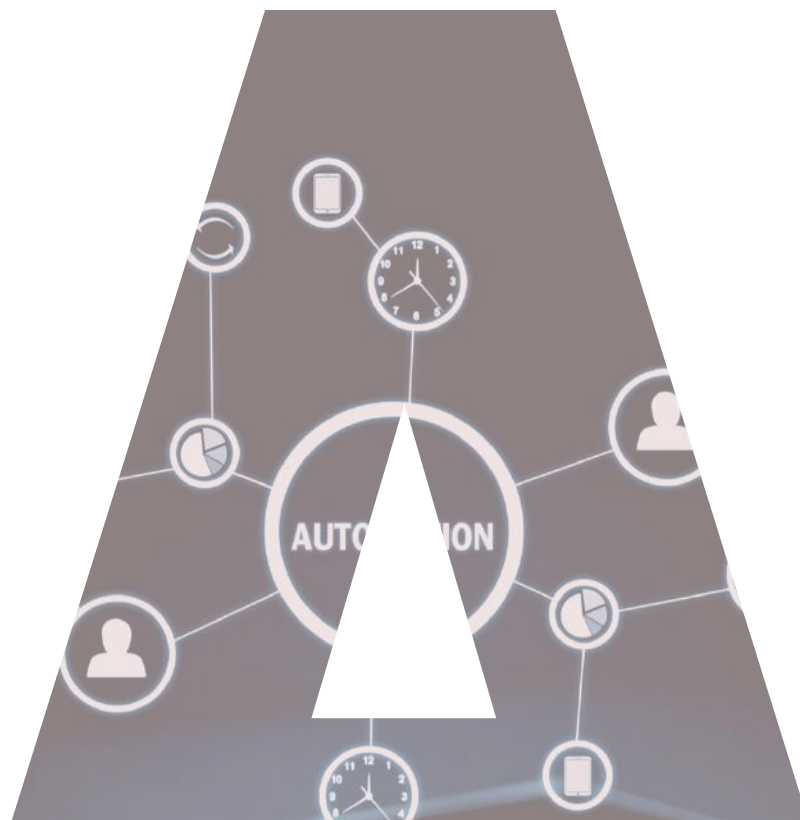

to diligently comprehend the needs of our clients and either recommend an existing solution or design a new one to ensure the long term viability and productivity.

AUTOMATE NEXT

"Developing Futuristic, Performance Based System"

Our Automate Next services identify the treasures of Organization from its data and processes to enrich its decisions, expand its vision and strategize goals with newfound capabilities.

AUTOMATE NEXT

Business Intelligence

- *Big Data*
- *Data Science*
- *Data Analytics*

to harness the potential of data into useful information for critical business decisions and growth.

Business Automation

- *End-end business process Automation*
- *Cloud based Robotic Process Automation*
- *Design Thinking*

to apply diverse technological capabilities in automating work for efficiency, quality and excellence

Internet of Things

- *Managed Services*
- *AI based Conversational Bots*
- *IoT Solutions with Machine Learning*

to help the business future proof and innovative we offer range of IoT solutions and Services for industries as well as consumers for experience NEXT.

Competitive Advantages

The world is transitioning rapidly at a pace never experienced before. Disruption has become the norm and companies who fail to assess this threat cease to exist within no time. Technology is not only omnipresent but it has become the driving force for any business whatsoever. It runs like blood into our systems and is the lifeline of our business. However, the paradox is, the more we become dependent upon technology the more we are susceptible to disruption.
